

Mid Module Standards
Number and Operations - Fractions

Standard 5.NF.1	Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators. For example, $\frac{2}{3} + \frac{5}{4} = \frac{8}{12} + \frac{15}{12} = \frac{23}{12}$. (In general, $\frac{a}{b} + \frac{c}{d} = \frac{ad + bc}{bd}$.)	
Evaluate	Math Test: Module 3	
4 10/10 9/10 A	I understand the <u>advanced</u> content	<ul style="list-style-type: none"> - I make no mistakes when solving. - I can add and subtract fractions including mixed numbers. - I understand that I can provide a <u>model</u> to prove my common denominators.
3 8/10 B	I understand the <u>target</u> content of the standard.	<ul style="list-style-type: none"> - I make a minor mistake. - I can add and subtract fractions including mixed numbers.
2 7/10 C	I understand the <u>basic</u> content of the standard.	<ul style="list-style-type: none"> - I struggle to solve the fractions including mixed numbers - I understand the basics towards adding and subtracting fractions.
1 NTY P: Pending	<u>With help</u> , I understand the <u>basic</u> content of the standard.	<ul style="list-style-type: none"> - With help, I can solve the basics towards adding and subtracting fractions.
0 NTY P: Pending	<u>With help</u> , I <u>struggle</u> to make progress.	<ul style="list-style-type: none"> - With help, I continue to struggle with adding and subtracting fractions.
